

An expert Retentions team who can really Raise the Roof!
Specialists in construction and commercial debt recovery

Retentions Experts CRS go over and above for a Yorkshire Roofing company and **recover 158% of their ledger...**

CRS were appointed by the liquidators of a roofing company in west Yorkshire with an outstanding sales ledger of £180,000.

On further investigation attending offices and spending days searching the books and record, CRS discovered retentions due to the company in excess of £250,000 which had not been documented or recorded. None of the retentions had been collected during the entire existence of the company.

Once collections had been made and retentions that were not statute barred had been recovered, CRS collected a total of £285,000 against what had been advised as a £180,000 ledger. Returning 158% of collections against original company books and records.

CRS are Construction debt recovery experts, with hands on experience of construction debt and a specialist debt recovery team. We offer a free review of construction ledgers and focus on the harder to collect debts, such as applications and retentions, giving you the best picture on what is recoverable and when its likely to be recovered by.

CRS provides a FREE initial review of the ledger, detailing the total amount of book debts, work in progress and retentions outstanding from each debtor and a predicted recovery based upon the information provided and the status of the company.
