

Helping You Get Your Cases Closed Quicker...

Specialists in construction and commercial debt recovery

Give us a try... the ledgers were passed over to CRS who recovered an additional £60,000 over 8 ledgers.

A Helping Hand in Closing Cases. How our Cold Case Review Service helped an Insolvency Firm.

CRS were appointed by a liquidator working to close a number of cases. Previous attempts to collect these small debtor ledgers had been made but due to capacity of the in-house recoveries team could not be prioritised. Rather than write the off the debt the ledgers were passed over to CRS whose involvement enables the recovery of an additional £60,000 over 8 ledgers.

This just goes to show that even when jobs are coming to a close there is often money to be found, CRS will review any cold cases. In the worst-case scenario with nothing to collect you will receive a free report saying the file should be closed and all attempts have been made to recover the debts. However, in the best-case scenario you will recover more from the case and support a larger distribution to creditors.

As debt recovery specialists we always strive to maximise the recoveries on all ledgers even on ledgers which have been cherry picked and subsequently deemed unrecoverable. Leaving you with peace of mind that creditors have their maximum dividend and cases can be closed.

CRS provides a FREE initial review of the ledger, detailing the total amount of book debts, work in progress and retentions outstanding from each debtor and a predicted recovery based upon the information provided and the status of the company.
